Overview

One Platform. Endless Possibilities.

TIES (The Integrated Energy System) is a powerful, all-in-one software solution that simplifies and streamlines transaction management across the energy value chain. From field to final sale, TIES delivers unparalleled efficiency, accuracy, and visibility for energy companies.

While TIES supports a broad range of energy sectors – including Producers, Gatherers, Pipeline & Storage Operators, and Marketers – it is especially impactful for **Gas Plant Processors**.

Built for Gas Plant Processing

Simplify the Complex. Automate with Confidence.

Gas processing involves complex contracts, daily volume balancing, and settlement with multiple stakeholders. TIES is designed to eliminate manual tasks, ensure compliance, and keep operations running smoothly - every day, every month.

Smart Contract Management

**Track Terms. Ensure Compliance.
Eliminate Errors.**

Easily manage all natural gas processing agreements, including producer rights, terms, and take-in-kind elections. Stay audit-ready with clear records, automated validations, and effortless reporting.

Automated Daily Allocations & Imbalance Handling

**Stay on top of volumes, imbalances,
and projections.**

TIES automates daily gas allocations and estimates end-of-month residue projections - supporting take-in-kind scheduling and accurate imbalance management.

Flexible Allocation Engines

**No matter how your contracts are
structured - TIES can handle it.**

Whether your contracts are based on fixed recovery, keep whole, percent of proceeds, capped, or tiered formulas - TIES automatically applies contractual logic and ensures calculations are accurate.

Automated Settlement Statements

Save Time and Improve Transparency.

Generate and distribute detailed Plant Allocation and Settlement Statements with a few clicks. Provide stakeholders with timely, accurate, and auditable data.

Full Product Lifecycle Support

**From Plant to Market - One Platform
Covers It All.**

Track, schedule, and sell all gas processing outputs - including NGLs, Inerts, and Residue Gas - within a single system.

Robust Reporting & Reconciliation

Insights when you need them.

Drill into any contract, transaction, or calculation with flexible, audit-ready reporting tools. Make decisions with confidence and clarity.

Success Story: Eagleridge Midstream Operations

Challenge:

Eagleridge (formerly 1849 Energy) faced growing complexity in managing plant processing and marketing operations. Manual workflows, disconnected data sources, and frequent reconciliation challenges were slowing down their month-end processes and increasing risk.

Solution:

By implementing TIES, Eagleridge was able to automate plant allocations, streamline contract and revenue management, and improve transparency across all stakeholders.

Results:

- Reduced manual entry and reconciliation time
- Faster, more accurate settlement statements
- Improved visibility into daily allocations and product sales
- Greater confidence in reporting and audit readiness

“TIES gave us the structure and automation we needed. Month-end processes are faster, cleaner, and far less stressful.”

— Operations Lead, Eagleridge

Shared Power Across All Energy Segments

One System. Multiple Segments. Total Synergy.

TIES supports not only plant processors, but also producers, gatherers, pipelines, and marketers – delivering tools that unify your operations.

Business Associate Management

Keep partner data organized: legal info, credit terms, transaction history, and more.

Price & Rate Administration

Easily apply index-based or formula-based pricing to contracts and transactions.

Contract Administration

Create and track buy/sell, transport, and service contracts with smart rules and alerts.

Infrastructure Management

Track facilities, locations, and interconnects across your network.

Integrated Accounting

Manage invoices, payments, and financial reconciliation in sync with your general ledger.

Standard APIs

Connect TIES with your ERP, pricing, measurement, or 3rd-party systems for seamless data exchange

Experience the Power of TIES Today

TIES offers a holistic approach to energy trade and transaction management, empowering plant processors and other industry stakeholders with advanced features, robust functionalities, and unparalleled efficiency. Experience the power of TIES today and unlock new possibilities for your energy operations.

Contact us now to schedule a personalized demo and discover how TIES can transform your energy operations and drive success in today's dynamic energy market.
