Overview

One Platform. Endless Possibilities.

TIES (The Integrated Energy System) is a powerful, all-in-one software solution that simplifies and streamlines transaction management across the energy value chain. From field to final sale, TIES delivers unparalleled efficiency, accuracy, and visibility for energy companies.

While TIES supports a broad range of energy sectors – including Gatherers, Gas Plant Processors, Pipeline & Storage Operators, and Marketers – it offers unique capabilities for Producers and those in Producer Services.

Built for Producers

Simplify the Complex. Automate with Confidence.

Producers of **Natural Gas** and **Crude Oil** face the challenge of preparing products for delivery and sale - while managing complex marketing, fees, ownership, and revenue processes.

TIES delivers full visibility and automation across the Producer value chain - from **wellhead to market** - empowering smarter decisions and seamless execution.

Determine Volumes Available for Sale

TIES calculates or imports **Available for Sale (AFS)** volumes at the wellhead or meter. It simulates transport and processing to project all associated products (NGLs, Inerts, Residue Gas) and adjusts for **imbalance make-up**, providing a solid foundation for scheduling.

Product Sales & Trading

TIES streamlines the buying and selling of energy commodities—handling **complex sales flows** across gathering, processing, and pipelines with ease.

Scheduling & Flow Tracking

With an integrated **Scheduling Module**, TIES manages nominations, applies **fuel & line loss**, and tracks transportation obligations. Measured daily flows are automatically allocated downstream, giving schedulers and traders **real-time insight** to manage imbalances.

Well Netback Pricing

TIES calculates precise **netback pricing** from market to wellhead—supporting sales at the plant, interconnect, or across multiple pipelines, with **auditable calculations**.

Imbalance Management

Track and manage key imbalances:

- Owner (entitlement vs. actual)
- Gathering & transportation
- Cash out
- Storage

Seamless Integration

TIES connects with third-party platforms to ensure **interoperability** and smooth data exchange across your ecosystem.

Shared Power Across All Energy Segments

One System. Multiple Segments. Total Synergy.

TIES supports not only **Producers**, but also **Gatherers**, **Pipelines**, **Plant Processors**, and **Marketers** – delivering tools that unify your operations.

Business Associate Management

Keep partner data organized: legal info, credit terms, transaction history, and more.

Price & Rate Administration

Easily apply index-based or formula-based pricing to contracts and transactions.

Contract Administration

Create and track buy/sell, transport, and service contracts with smart rules and alerts.

Infrastructure Management

Track facilities, locations, and interconnects across your network.

Integrated Accounting

Manage invoices, payments, and financial reconciliation in sync with your general ledger.

Standard APIs

Connect TIES with your ERP, pricing, measurement, or 3rd-party systems for seamless data exchange.

Success Story: Scissortail Energy: Automating DOI and Revenue Workflows

Challenge:

Scissortail Energy needed to simplify and automate critical midstream revenue processes - including **Division of Interest (DOI) payments, Force Pooling, and Escheat**. Manual steps were creating inefficiencies and compliance risks.

Solution:

By implementing TIES, Scissortail Energy fully automated DOI calculations, streamlined revenue distributions, and integrated Escheat and Force Pooling workflows into a single system.

Results:

- Automated DOI, Escheat, and Force Pooling processes
- Faster and more accurate revenue distributions
- Greater compliance confidence
- Improved transparency for partners and regulators

“TIES gave us a scalable way to manage complex Producer workflows while improving audit readiness.”

— Scissortail Energy

Experience the Power of TIES Today

TIES offers a holistic approach to energy trade and transaction management, empowering Producers and other industry stakeholders with advanced features, robust functionality, and unparalleled efficiency.

Contact us now to schedule a personalized demo and discover how TIES can transform your energy operations and drive success in today's dynamic energy market.
